KDJA presents monitoring unit to SGH

KUCHING: The Kuching Division Journalists Association (KDJA) continues to assist medical practitioners in their fight against Covid-19.

Recently, it handed over a patient's monitoring unit worth RM12,500 to Sarawak General Hospital (SGH) under its 'Love Donation' drive.

Under this drive, the donors included Sarawak Metro Sdn Bhd, Fortune Villa, Cool Mediware Supplies and also members of the local media.

"It is the sincerity from the heart that we are doing something to help others.

"As we know, this pandemic is causing a lot of suffering and creating a shortage of resources everywhere. I want to thank Sarawak Metro for playing a role in this fight against the pandemic. This is what is great about Sarawak – everybody coming together to do something," said state Local Government and Housing Minister Dato Sri Dr Sim Kui Hian, who is also Sarawak Disaster Management Committee (SDMC) advisor, at the cheque handing-over ceremony involving Sarawak Metro and KDJA, which was represented by its chairman Ronnie Teo.

KDJA had ordered and received the patient's monitoring unit in Kuching, before handing it to SGH last Friday.

"Sarawak Metro really appreciates what the association is doing, and we would like to show our support and also to the Sarawak government to combat this pandemic.

> It is the sincerity from the heart that we are doing something to help others. As we know, this pandemic is causing a lot of suffering and creating a shortage of resources everywhere. I want to thank Sarawak Metro for playing a role in this fight against the pandemic.

"We are looking forward to supporting frontliners who have been working hard. In the future, we are thinking of doing more of this corporate service in Sarawak," said Mazli Mustaffa, chief executive officer of Sarawak Metro.

Earlier in June, KDJA donated an oxygen generator to SGH, also through its 'Love Donation' drive and alongside the Sarawak Federation of Chinese Association (SFCA).

To date, KDJA has raised RM18,000 worth of donations of medical equipment and various materials.
